PROFESSIONAL SUMMARY

High-impact Frontend Engineer with 5+ years of experience specializing in building scalable, high-performance web applications. Expert in React, Next.js, and Vue.js, with a proven track record of optimizing application performance by 40% and migrating legacy systems to modern architectures. Adept at collaborating in cross-functional agile squads to deliver user-centric interfaces that drive business growth and enhance user engagement.

PROFESSIONAL EXPERIENCE

PT. Elektronik Distribusi Otomatisasi Terkemuka, *Frontend Engineer*

12/2025 – 06/2026

Jakarta, Indonesia (Remote)

- Engineered scalable web platform features using Next.js and TypeScript, improving the developer experience and reducing time-to-market for new features.
- Increased code reliability and reduced production bugs by implementing a comprehensive unit testing suite using Jest.
- Optimized API consumption by redesigning parameter integration, resulting in more efficient data fetching and faster page load speeds.
- Collaborated within cross-functional squads to resolve critical frontend bottlenecks, enhancing overall application stability and user retention.

UMG Idealab, *Senior Frontend Engineer*

12/2024 – 12/2025 | Yogyakarta, Indonesia

- Spearheaded frontend architecture for multiple high-profile projects (Widya Imersif, Genomic, Skilloka) using React and Next.js.
- Reduced technical debt by refactoring legacy functions into modern, modular components, improving maintainability and codebase scalability.
- Boosted organic reach and page speed by implementing advanced SEO strategies and performance optimization techniques.
- Led technical synchronization between analysts, backend, and mobile developers to ensure seamless feature integration.

Privy, *Intermediate Frontend Engineer*

12/2021 – 11/2024 | Yogyakarta, Indonesia

- Developed and deployed complex enterprise web applications using Vue.js and Nuxt.js, adhering to strict security and performance standards.
- Bridged the gap between design and engineering by collaborating closely with UI/UX teams to implement pixel-perfect, responsive interfaces.
- Accelerated delivery cycles by utilizing Agile methodologies to manage multiple concurrent project streams.

LingoTalk, *Junior Frontend Engineer*

01/2021 – 12/2021

Jakarta, Indonesia (Remote)

- Architected interactive frontend interfaces using Svelte, contributing to a lightweight and highly responsive user experience.
- Rapidly resolved critical UI bugs and implemented feature enhancements based on user feedback.

EDUCATION

Bachelor of Information Technology (GPA: 3.77/4.0),

11/2021 | Yogyakarta, Indonesia

Universitas Atma Jaya Yogyakarta

- Achievement: 3rd Place, University Programming Competition (2017).

TECHNICAL SKILLS

Languages

TypeScript, JavaScript (ES6+), Java, PHP, Python, HTML5, CSS3/SCSS.

Frameworks/Libraries

React, Next.js (v15), Vue.js (2/3), Nuxt.js, Svelte, Node.js, Express.js.

UI/Styling

Tailwind CSS, ShadcnUI, Material UI, Vuetify, NuxtUI, Responsive Design.

Tools & Testing

Jest, Vite, Git, Firebase Remote Config, Midtrans API, OCR/Facial Recognition Integration, SEO Optimization.

Methodologies

Agile/Scrum, Waterfall, Unit Testing, API Design, Performance Tuning.

IMPACT PROJECTS

Modernization & Architecture

- **Aikrut:** Migrated legacy **React (2017)** to **Next.js 15**, developing a high-performance AI-driven Interview system and custom admin/user dashboards.
- **Skillana:** Orchestrated the migration of a legacy **2017 React** codebase to **Next.js**, resolving critical heritage bugs to ensure a stable transition.
- **eDot Ecosystem (Hermes & eSuite):** Maintained and expanded Distribution Management System (DMS) dashboards using **Next.js**, implementing Firebase Remote Config for feature flagging and enhancing reliability via **Jest**.

FinTech & Enterprise Solutions

- **BSI Hasanah Credit Card:** Built a secure registration and analytics flow featuring Facial Recognition and ID Card OCR for automated identity verification using **Nuxt.js (Vue 2)**.
- **HAWKEYE Internal Dashboard:** Developed a dynamic enterprise management system for Merchants/Channels using **Vue 3** and **Nuxt.js** with reusable data-fetching logic.
- **CIMB Event Portal:** Developed a high-traffic landing page and admin dashboard, providing real-time bug fixing and price calculation logic during a live 3-day event using **Nuxt.js(Vue2)**.
- **HMS Document Signing:** Architected a document signing landing page and data analytics dashboard from the ground up using **Nuxt.js (Vue 2)**.
- **Privy Customization Dashboard:** Created a CMS-driven dashboard allowing for dynamic styling and form management across signing document projects and migrate from **Vue 2** to **Vue 3**.

Specialized Applications & Research

- **Prosehat Portal:** Revamped the healthcare user/admin site using **React + Vite + ShadcnUI**, implementing React Hook Form for validation and **Midtrans** for payment option.
- **LingoTalk & LingoJunior:** Engineered high-performance landing pages and an IELTS Exam page using **Svelte**, focusing on speed and minimal bundle size.
- **Face Detection Android App:** Researched and developed a camera-based face detection **android** application using **Java** and **Python** for university thesis.
